EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Hanscomb on March 25, 2007. The purpose of the examiner's amendment was to place the application in condition for allowance by adding claim language to claim 1.

The application has been amended as follows:

IN THE CLAIMS:

In claim 1: In lines 2 and 3, "first and second spaced cylinder ends and a cylinder body between said first and second cylinder ends; has been deleted and - - first and second spaced cylinder ends and a cylinder body between said first and second cylinder ends, said cylinder body being adapted to print at least one image, in a first image location, on the web engageable with said cylinder body- - has been inserted.

In claim 1: In line 5, "a" has been deleted and - - the- - has been inserted.

In claim 1: In line 11, - - said- - has been inserted prior to "at least".

In claim 1: In lines 11 and 12, "formed on said web engagable with said cylinder body" has been deleted and - - printed on the web engagable with said cylinder body from said first image location to a second image location, different from said first image

location, as a function of said imposition of said cylinder bend on said cylinder- - has been inserted.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art does not meet or render obvious first and second spaced cylinder ends and a cylinder body between the first and second cylinder ends, the cylinder body being adapted to print at least one image, in a first image location, on the web engageable with the cylinder body and means shifting the first and second spaced cylinder ends and the cylinder body with respect to each other to impose a cylinder bend on the cylinder in one of a direction in, and opposite to the web-travel direction to displace location of said at least one image element printed on the web engagable with the cylinder from said first image location to a second image location, different from said first image location, as a function of said imposition of said cylinder bend on said cylinder.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
